

JUVÉDERM[®] JOURNEY

Smooth.
Natural-looking.
Long-lasting.

#1

chosen*
requested†
recommended filler brand
by patients‡ and providers§

Actual patient treated with JUVÉDERM[®] VOLUMA[®] XC in the cheeks, JUVÉDERM[®] VOLBELLA[®] XC in the undereye hollows and lips, and JUVÉDERM[®] VOLLURE[®] XC in the smile lines. **Results may vary.**

*Based on January 2024 healthcare provider survey data (n = 886).

†Based on a November 2022 survey of females recruited from market research panels who have had filler treatment in the past 2 years (n = 98).

‡Among leading filler brands in survey data collected January to April 2023, 70% of females treated with a JUVÉDERM[®] filler in the last year were likely to recommend it to friends interested in dermal fillers (n = 356).

§Among leading brands in survey data collected February to April 2023, 64% of healthcare providers who use JUVÉDERM[®] fillers in their practice are likely to recommend it to colleagues (n = 747).

JUVÉDERM[®] Injectable Gel Fillers Important Information APPROVED USES

JUVÉDERM[®] VOLUMA[®] XC injectable gel is for deep injection in the cheek area to correct age-related volume loss, for augmentation of the chin region to improve the chin profile, and for augmentation of the temple region to improve moderate to severe temple hollowing in adults over 21.

Please see additional Approved Uses and Important Safety Information inside.

START YOUR JOURNEY CONFIDENTLY WITH A FULL-FACE ASSESSMENT

What are your aesthetic goals?

You and your aesthetic specialist will work together to customize your unique treatment plan. Areas of your face are interrelated and your specialist may recommend treatment in one area before treating other areas.

JUVÉDERM® Injectable Gel Fillers Important Information (continued)

IMPORTANT SAFETY INFORMATION (continued)

What warnings should my doctor advise me about?

- One of the risks with using dermal fillers is the unintentional injection into a blood vessel. The chances of this happening are very small, but if it does happen, the complications can be serious and may be permanent. These complications, which have been reported for facial injections, can include vision abnormalities, blindness, stroke, temporary scabs, or permanent scarring of the skin. Most of these events are irreversible.

Please see additional Important Safety Information on the following pages.

COLLABORATE WITH YOUR AESTHETIC SPECIALIST IN 3 SIMPLE STEPS

1. Detail

Talk to your aesthetic specialist about any of your aesthetic concerns and goals.

2. Determine

Your aesthetic specialist will help you choose the treatments that are right for you to achieve the goals you want.

3. Discuss

You and your aesthetic specialist will customize your JUVÉDERM® Journey treatment plan.

Before JUVÉDERM® treatment

JUVÉDERM® Injectable Gel Fillers Important Information (continued)

IMPORTANT SAFETY INFORMATION (continued)

What warnings should my doctor advise me about? (continued)

- If you have changes in your vision, signs of a stroke (including sudden difficulty speaking, numbness or weakness in your face, arms or legs, difficulty walking, face drooping, severe headache, dizziness, or confusion), white appearance of the skin, or unusual pain during or shortly after treatment, you should notify your health care practitioner immediately.

Total: 9.2 mL

*In the JUVÉDERM® VOLUMA® XC clinical study in the chin, the main measure of study success was not met in patients with darker skin. However, their satisfaction was still high.

JUVÉDERM® Injectable Gel Fillers Important Information (continued)
IMPORTANT SAFETY INFORMATION (continued)

What precautions should my doctor advise me about? (continued)

- Tell your doctor if you are on therapy used to reduce your body's natural defense system (such as steroids, chemotherapy, and medicines to treat autoimmune diseases, HIV, and AIDs), as these may increase your risk of infection; and medications that can prolong bleeding (such as aspirin, ibuprofen, or other blood thinners), as these may result in increased bruising or bleeding at the injection site.

Please see additional Important Safety Information on the following pages.

JUVÉDERM® Injectable Gel Fillers Important Information (continued)
IMPORTANT SAFETY INFORMATION (continued)
What precautions should my doctor advise me about? (continued)

- Avoid applying makeup for 12 hours after treatment and minimize strenuous exercise, exposure to extensive sun or heat, and alcoholic beverages within the first 24 hours following treatment, as these may cause temporary redness, swelling, and/or itching at the injection site

Please see additional Important Safety Information on the following pages.

JUVÉDERM® JOURNEY

What to expect

Your aesthetic specialist will take your medical history and provide a full-face assessment. Be prepared to discuss your facial aesthetic goals. Actual treatment with JUVÉDERM® injectable gels typically takes 15 to 60 minutes, depending on which area of your face is being treated.

How long will my results last?

Depending on the JUVÉDERM® filler used and the treatment area, results last up to 1 to 2 years with optimal treatment. It's important to note that treatment with JUVÉDERM® fillers is not permanent. Please read each product description to see how long results last with each formula and treatment area, based on what was observed in clinical studies.

Are there any side effects that I may experience?

The most common side effects are redness, swelling, pain, and tenderness. Minimize exercise, sun or heat exposure, and alcoholic beverages within the first 24 hours following treatment to avoid worsening these side effects. Talk to your licensed aesthetic specialist about post-care instructions, including when makeup may be applied following treatment, and please see Important Safety Information throughout this brochure.

GET STARTED TODAY

Book a consultation with your aesthetic specialist to determine if treatment is right for you. Talk about your facial aesthetic goals and what you want to achieve on your JUVÉDERM® Journey.

Helpful conversation starters for a smooth appointment:

- ✓ “Why are different JUVÉDERM® products used to treat different areas?”
- ✓ “In my full-face assessment, can you tell me more about how areas of the face are interrelated?”
- ✓ “Do different products last longer than others?”
- ✓ “How do you decide which areas to treat during my appointment?”
- ✓ “How can I achieve natural-looking results along my JUVÉDERM® Journey?”
- ✓ “How do we determine which JUVÉDERM® fillers are best for my Journey?”

JUVÉDERM® Injectable Gel Fillers Important Information (continued)

IMPORTANT SAFETY INFORMATION (continued)

What precautions should my doctor advise me about? (continued)

- JUVÉDERM® VOLUMA® XC was not studied in patients with significant loose skin of the chin, neck, or jaw
- The effect of JUVÉDERM® VOLUMA® XC injection into the chin on facial hair growth has not been studied
- Patients who experience skin injury near the site of JUVÉDERM® VOLUMA® XC injection may be at a higher risk for adverse events
- Tell your doctor if you have already been injected with dermal fillers in the same area as the one(s) you are about to be treated for. This information helps your doctor decide when and whether you should get treatment

Please see additional Important Safety Information on the back cover.

Collection of Fillers.

JUVÉDERM® Injectable Gel Fillers Important Information (continued)

IMPORTANT SAFETY INFORMATION (continued)

What are possible side effects of treatment?

The most commonly reported side effects with JUVÉDERM® injectable gels were redness, swelling, pain, tenderness, firmness, lumps/bumps, bruising, discoloration, and itching. For JUVÉDERM® VOLBELLA® XC, dryness was also reported.

These side effects are consistent with other facial injection procedures and most will resolve within 30 days. Your doctor may choose to treat side effects persisting longer with antibiotics, steroids, or hyaluronidase (an enzyme that breaks down hyaluronic acid).

As with all skin injection procedures, there is a risk of infection.

To report a side effect with any product in the JUVÉDERM® Collection, please call the Allergan® Product Support Department at 1-877-345-5372. Please also visit Juvederm.com or talk to your doctor for more information.

Products in the JUVÉDERM® Collection are available only by a licensed physician or properly licensed practitioner.

BOTOX® Cosmetic Indications and Important Safety Information

BOTOX® Cosmetic (onabotulinumtoxinA) is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe forehead lines, crow's feet, and frown lines between the eyebrows in adults.

Talk to your doctor about BOTOX® Cosmetic and whether it's right for you. There are risks with this product—the effects of BOTOX® Cosmetic may spread hours to weeks after injection causing serious symptoms.

Alert your doctor right away as difficulty swallowing, speaking, breathing, eye problems or muscle weakness can be a sign of a life-threatening condition. If this happens, do not drive a car, operate machinery, or do other dangerous activities. Patients with these conditions before injection are at the highest risk. Swallowing problems may last for several months. Side effects may include allergic reactions, neck and injection-site pain, fatigue and headache.

Allergic reactions can include rash, welts, asthma symptoms, and dizziness. Don't receive BOTOX® Cosmetic if there's a skin infection. Tell your doctor your medical history, muscle or nerve conditions (including ALS/Lou Gehrig's disease, myasthenia gravis, or Lambert-Eaton syndrome), and medications, including botulinum toxins, as these may increase the risk of serious side effects.

Scan to see BOTOX® Cosmetic full Prescribing
Information, including Boxed Warning and
Medication Guide.
